

# Naruebet Singsathon

Junior Web Developer Seeking Growth Opportunities

Fresh out of Fullstack Web Developer training, equipped with proficiency in .NET, frontend, and backend technologies. Aged 24, I am enthusiastic to kick off my professional journey, seeking a role where I can expand my knowledge and expertise. I am eager to tackle new obstacles and add value to a dynamic team.

## Experience

08 Januari - 12 april 2024

### Avensia

"LIA 2 / Internship"

During my internship at Avensia, I was tasked with developing an SEO tool to integrate into their Nitro system. The tool was designed to be part of their suite for analyzing websites directly, providing SEO scores, and identifying areas for improvement. Additionally, it was meant to save the last five analyses so that improvements could be tracked over time.

I also participated in a larger project where I contributed by fixing minor bugs. As part of my role, I learned to use Jira for project management and took part in standup meetings to stay updated on the team's progress and coordinate tasks. Unfortunately, I am unable to provide details about the larger project due to confidentiality.

04 September - 13 oktober 2023

### Rocketlabs

"LIA 1 / Internship"

At Rocketlabs, I developed an SEO tool and worked on both front-end and back-end tasks. The project involved integrating Chart.js for data visualization, which required significant front-end work. I also learned PHP Laravel, a technology I hadn't studied before, so there was a lot of new information to absorb. Additionally, I participated in daily standup meetings to stay aligned with the team's progress and coordinate our efforts.

2022 - 2023

### Green Station & Sala Siam

Extra personal

At Green Station & Sala Siam, I worked as a server. My tasks included cooking and preparing food, serving customers, and working at the cash register.
