About Me

Junior .NET developer focused on creating modern web solutions. I am a curious problem solver who is meticulous and adaptable in my coding, always striving to write clean and efficient code. Motivated to continuously learn and develop my skills to contribute to exciting projects.

I have the right to participate in the Job Guarantee program through the Swedish Public Employment Service. This means that I may receive reduced salary costs for my employment for one year.

Experience

Avensia (Internship, LIA-2)

 **January 8 – April 12, 2024**

Worked on the development of a project focusing on SEO optimization of an e-commerce system. The tools used included an API for structured data, improving website indexing and search engine ranking.

Rocketlabs (Internship, LIA-1)

 **September 4 – October 13, 2023**

Contributed to a project that optimized and automated SEO indexing. I worked with a structured API and utilized Chart.js for presenting data on a dashboard.
